ELSEVIER

Biomembranes

Vol. 1194, 1994

BBA Biochimica et Biophysica Acta

Cumulative Contents

Information for Contributors vii

Regular Papers

Human spermatozoa glycerol permeability and activation energy determined by electron paramagnetic resonance
J. Du, F.W. Kleinhans, P. Mazur and J.K. Critser (USA) 1

Solubilization by Triton X-100 makes possible complete recovery of lipids from liposomes in enzymatic assay
A. Nagayasu, T. Shimooka and H. Kiwada (Japan) 12

Calcium-induced interaction and fusion of archaeobacterial lipid vesicles: a fluorescence study
A. Relini, D. Cassinadri, Z. Mirghani, O. Brandt, A. Gambacorta, A. Trincone, M. De Rosa and A. Gliozzi (Italy) 17

Lipid–protein interactions and protein dynamics in vesicles containing the nicotinic acetylcholine receptor: a study with ethanol
V. Abadji, D.E. Raines, L.A. Dalton and K.W. Miller (USA) 25

Quantification and removal of glycogen phosphorylase and other enzymes associated with sarcoplasmic reticulum membrane preparations
A. Cuenda, F. Henao, M. Nogues and C. Gutiérrez-Merino (Spain) 35

Taurine and β-alanine transport in an established human kidney cell line derived from the proximal tubule
H. Jessen (Denmark) 44

Interaction of cord factor (α,α′-trehalose-6,6′-dimycolate) with phospholipids
L.M. Crowe, B.J. Spargo, T. Ioneda, B.L. Beaman and J.H. Crowe (USA, Brazil) 53

Fluorinated phosphatidylcholine-based liposomes: H^+/Na^+ permeability, active doxorubicin encapsulation and stability in human serum
F. Frézard, C. Santaella, M.-J. Montisci, P. Vierling and J.G. Riess (France) 61

Topography of alphaxalone and Δ^{16}-alphaxalone in membrane bilayers containing cholesterol
T. Mavromoustakos, D.-P. Yang and A. Makriyannis (Greece, USA) 69

Changes of protein structure, nucleotide microenvironment, and Ca^{2+}-binding states in the catalytic cycle of sarcoplasmic reticulum Ca^{2+}-ATPase: investigation of nucleotide binding, phosphorylation and phosphoenzyme conversion by FTIR difference spectroscopy
A. Barth, W. Kreutz and W. Mäntele (Germany) 75

Sodium-coupled transport of glucose by plasma membranes of type II pneumocytes
D.G. Oelberg, F. Xu and F. Shabarek (USA) 92

Properties of phosphatidylcholine bilayers as revealed by mixed-acyl phospholipid fluorescent probes containing *n*-(9-anthroyloxy) fatty acids
J.T. Mason (USA) 99

Anesthetic alteration of ryanodine binding by cardiac calcium release channels
C. Lynch III and M.J. Frazer (USA) 109

Transport of 2-aminoisobutyric acid in cultured endothelial cells
Y.-T. Lau, J.-K. Chen, B.-S. Chen and C.-C. Hsieh (Taiwan) 118

The effect of phospholipase A_2 on chloride transport by pancreatic secretory granules
K.W. Gasser and J.R. Holda (USA) 123

Cell partitioning in two-polymer aqueous phase systems and cell electrophoresis in aqueous polymer solutions. Human and rat young and old red blood cells
H. Walter and K.E. Widen (USA) 131

Effect of β-carotene on structural and dynamic properties of model phosphatidylcholine membranes. I. An EPR spin label study
K. Strzałka and W.I. Gruszecki (Poland) 138

Effect of β-carotene on structural and dynamic properties of model phosphatidylcholine membranes. II. A ^{31}P-NMR and ^{13}C-NMR study
I. Jeżowska, A. Wolak, W.I. Gruszecki and K. Strzałka (Poland) 143

The HUP1 gene product of *Chlorella kessleri*: H^+/glucose symport studied in vitro
M. Opekarová, T. Caspari and W. Tanner (Czech Republic, Germany) 149

continued

Monoclonal antibody to phosphatidylserine inhibits Na^+/K^+-ATPase activity
F.M.A.H. Schuurmans Stekhoven, J. Tijmes, M. Umeda, K. Inoue and J.J.H.H.M. De Pont (The Netherlands, Japan) 155

Inhibitory mechanism of Ca^{2+} on the hemolysis caused by *Vibrio vulnificus* cytolysin
J.-W. Park, T.-A. Jahng, H.-W. Rho, B.-H. Park, N.-H. Kim and H.-R. Kim (South Korea) 166

Several types of sodium-conducting channel in human carcinoma A-431 cells
Yu.A. Negulyaev, E.A. Vedernikova and G.N. Mozhayeva (Russia) 171

Characterization of the glycine transport system GLYT 1 in human placental choriocarcinoma cells (JAR)
W. Liu, F.H. Leibach and V. Ganapathy (USA) 176

Liposome targeting to human immunodeficiency virus type 1-infected cells via recombinant soluble CD4 and CD4 immunoadhesin (CD4-IgG)
D. Flasher, K. Konopka, S.M. Chamow, P. Dazin, A. Ashkenazi, E. Pretzer and N. Düzgüneş (USA) 185

Net uptake of orthophosphate in Ehrlich ascites tumor cells in the presence of purine riboside may be rate limiting for the expansion of the pool of ribonucleotides
M. Marcussen, K. Overgaard-Hansen and H. Klenow (Denmark) 197

Choline transport in human placental brush-border membrane vesicles
S.M. Grassl (USA) 203

Regular Papers

The voltage-dependent action of pentobarbital on batrachotoxin-modified human brain sodium channels
B. Rehberg, D.S. Duch and B.W. Urban (USA, Germany) 215

Interaction of melittin with lipid membranes
S. Ohki, E. Marcus, D.K. Sukumaran and K. Arnold (USA) 223

A temperature study of diacetylenic phosphatidylcholine vesicles
G.L. Jendrasiak, A.A. Ribeiro, M.A. Nagumo and P.E. Schoen (USA) 233

Effect of low temperatures on the transfer of phospholipids with various acyl-chain lengths to the plasma membrane of leek cells
P. Moreau, B. Sturbois, D.J. Morré and C. Cassagne (France, USA) 239

Single-channel activity induced in mitoplasts by alkaline pH
Yu.N. Antonenko, D. Smith, K.W. Kinnally and H. Tedeschi (USA) 247

Simultaneous influence of erythrocyte deformability and macromolecules in the medium on erythrocyte aggregation: a kinetic study by a laser scattering technique
E. Muralidharan, N. Tateishi and N. Maeda (Japan) 255

Studies on the efflux of heme from biological membranes
H.H. Liem, N. Noy and U. Muller-Eberhard (USA) 264

On the main phase transition temperatures of highly asymmetric mixed-chain phosphatidylcholines
S. Li, Z.-q. Wang, H.-n. Lin and C. Huang (USA) 271

A phase behavior study of mixtures of sphingosine with zwitterionic phospholipids
F. López-García, J. Villalaín and J.C. Gómez-Fernández (Spain) 281

Polyamine-sensitive magnesium transport in *Saccharomyces cerevisiae*
T. Maruyama, N. Masuda, Y. Kakinuma and K. Igarashi (Japan) 289

Identification of a novel neutrophil membrane protein involved in modulation of oxidative burst
M. Michetti, R. De Tullio, E. Melloni and S. Pontremoli (Italy) 296

Short-circuit current overshoot in epithelial sodium channels following apical sodium jump
S. Machlup and T. Hoshiko (USA) 303

Comparisons of the relative effects of polyhydroxyl compounds on local versus long-range motions in the mitochondrial inner membrane. Fluorescence recovery after photobleaching, fluorescence lifetime, and fluorescence anisotropy studies
B. Chazotte (USA) 315

Functional analysis of conserved cysteine residues in the catalytic subunit of the yeast vacuolar H^+-ATPase
L. Taiz, H. Nelson, K. Maggert, L. Morgan, B. Yatabe, S.L. Taiz, B. Rubinstein and N. Nelson (USA) 329

Transfer of membrane proteins from human platelets to liposomal fraction by interaction with liposomes containing an artificial boundary lipid
Y. Okumura, M. Ishitobi, M. Sobel, K. Akiyoshi and J. Sunamoto (Japan, USA) 335

Anion transport function of mouse erythroid band 3 protein (AE1) does not require acylation of cysteine residue 861
D. Kang, D. Karbach and H. Passow (Germany) 341

Rapid Report

Interaction of radiolabelled Na,K-ATPase-liposomes with human peripheral blood mononuclear cells
B.M. Anner, E. Meneghini, S. Hussain, D. Lacotte and M. Moosmayer (Switzerland) 345

Short Sequence-Paper

Sequence of a putative transporter from rabbit kidney related to the Na^+ / glucose cotransporter gene family
A.M. Pajor (USA) 349

Cumulative Contents, Vol. 1194 353
